PathogenCombat
for safe food

PathogenCombat Newsflash

The PathogenCombat Newsflash is a source of information on trends, results, and events on the PathogenCombat activities within the field of Food Safety. Periodical issues inform you about new trends and developments and provide insight into the latest research results and their applications.

The Newsflash makes sure that you do not miss the events of PathogenCombat! You are updated regularly on our activities, including workshops and contributions to conferences on Food Safety in Europe.

The Newsflash is issued at least once per month and delivers an exciting insight into PathogenCombat activities.

Enjoy!

18.02.2010

Table of Contents

1. PathogenCombat workshop in Cork, Ireland
2. CEFood Congress 2010 in Bratislava, Slovak Republic
3. Food Micro in Copenhagen, Denmark

Topic 1

PathogenCombat workshop "Hygienic Processing" in Cork, Ireland

We look forward to the next PathogenCombat workshop with the title **Hygienic Processing**.

The workshop will take place at the Cork International Airport Hotel, Ireland on **9. March 2010**.

The workshop will give an overview on important aspects in the area of Food Safety and Quality:

- New processing technologies to reduce the presence of pathogens in foods
- Application of novel processing techniques
- Hygienic processing systems and engineering

We are happy to present this workshop as a cooperation of **University of Stuttgart, Cocker Consulting** and **European Hygienic Engineering & Design Group (EHEDG)**.

Additional information and registration are available [here](#).

Topic 2

CEFood Congress in Bratislava, Slovak Republic

We would like to draw your attention to the 5th Central European Congress on Food (CEFood) which will be held on **19th – 22nd May 2010** in hotel Tatra, Bratislava, Slovak Republic.

The main objective of the conference is the exchange of latest research results in fundamental and applied food science, research and development, innovative technology, food safety and market, functional and bioactive food and new trends in nutrition and health.

There will be lectures on Food Processing and Storage, Food Analysis, Biotechnology and Microbiology, Risk Analysis, Food Quality Management and Safety, Health and Nutrition Food Marketing and Consumers and Sustainable Food Production.

One part of this conference will be the highlights of PathogenCombat, especially the **unique achievements of PathogenCombat**. The planned agenda/speakers will be as follows:

- Mogens Jakobsen: Overview about the results from PathogenCombat
- Luca Coccolin: Rapid and meaningful detection methods
- Liesbeth Jacxsens: Food Safety Management

- Alan Friis: Methods for breaking the transmission of pathogens along the food chain
- Bruno Biavati: New protective and probiotic cultures
- Jordi Rovira: Interaction with food-producing SMEs
- Susanne Braun: Interaction strategy for information exchange to the food industry and other relevant stakeholders

For more detailed information about this topic please look [here](#).

So far, this congress has always been highly visited and evaluated as a great conference.

For more information about the CEFood congress please look [here](#).

Topic 3

Food Micro in Copenhagen, Denmark

We would like to point to the 22nd International ICFMH Symposium Food Micro 2010 in Copenhagen, Denmark on **30. August - 3. September 2010**.

The overall theme is "Microbial Behaviour in the Food Chain".

Special emphasis will be on how microbes respond to changes in their environment and the congress will address applied and fundamental aspects of microbial behaviour in

- Food fermentation and spoilage
- Adverse environments
- Risk assessment
- Food production
- The intestinal tract

We want to emphasize the **EU-Seminar** on 3rd of September. It will take place at the Faculty of Life Sciences (KU-LIFE), University of Copenhagen, at 8:30 am - 4:15 pm. Please notice the registration deadline (15. July).

This seminar will be structured around presentations highlighting scientifically areas and results from **PathogenCombat**, ProSafeBeef and BioTracer. More Information and the final programme are available [here](#).

The Food Micro 2010 will be held at the Bella Center in the Oresund region, and will be dedicated to the renaissance of microbial physiology for the production of fresh, safe, and healthy foods.

The congress intends to bring together scientists from the forefront of all sectors within the community of microbial behaviour, to highlight the latest scientific developments in the field.

Further information and registration can be found [here](#).

We are looking forward to meeting you at one of the events!
