

PathogenCombat Newsflash

The PathogenCombat Newsflash is a source of information on trends, results, and events on the PathogenCombat activities within the field of Food Safety. Periodical issues inform you about new trends and developments and provide insight into the latest research results and their applications.

The Newsflash makes sure that you do not miss the events of PathogenCombat! You are updated regularly on our activities, including workshops and contributions to conferences on Food Safety in Europe and worldwide.

The Newsflash is issued at least once per month and delivers an exciting insight into PathogenCombat activities.

Enjoy!

Table of contents

1. **IUMS 2011 - International Union of Microbiological Societies 2011**
2. **What's for lunch? Interactive conference on a decade of EU funded research**
3. **"Food safety and authenticity" 2011**
4. **International Conference on Food Processing Hygiene**

Topic 1

IUMS 2011- Sapporo, Japan.

We would like to announce the **IUMS Congresses 2011**, which will be held in the beautiful city of **Sapporo** (in Hokkaido, the northernmost island of Japan) from the **6 – 16 September 2011**, and hosted by the Federation of Microbiological Societies of Japan.

Further information on the event available [here](#)

Topic 2

What's for lunch? Interactive conference on a decade of EU funded research

The **What's for Lunch conference** includes some of the world's largest food safety research projects in the areas of microbiology, chemistry and food production technologies.

The event will take place in **Brussels**, the **20 of September 2011** and demonstrate what has been done in this respect and what has still to be done to ensure proper food chain integrity and food security.

Details and the registration form are available [here](#)

Topic 3

We would like to draw your attention to the **Food Safety and Authenticity Conference** that will be held in **Brussels** from the **18-20 October 2011**. A comprehensive approach on how to identify, prevent and manage broken links and the wide range of emerging contaminants along the supply chain.
